

Removes Sludge From Problem Tanks

- Dissolves and Eliminates sludge build up
- Cleans tanks, lines, filters, nozzles, and heat exchangers
- Improves heat transfer, less lost heat
- Inhibits corrosion of the fuel system
- Emulsifies and controls water
- Retards biological growth
- Completely miscible in fuel
- Improves distillate & residual fuel combustion for increased BTU's

This distillate conditioner complies with the federal low sulfur content Requirements.
